Summary

Software and quality assurance engineer with 5+ years of experience in software testing, test automation, developing full-stack applications, data integration solutions. Strong background in Java, Python, React.js, SQL/databases and test automation frameworks such as Selenium, Playwright and Appium. Adept at cloud technologies like Docker and CI/CD pipelines. Earned MSc. in Communication Systems from EPFL with 5.20/6.0 GPA.

Technologies

Programming: Java, Automation (Appium, Selenium, Playwright, API), Python, TypeScript (React.js), Bash, C++

Databases: PostgreSQL, OracleDB, Data Warehousing

Cloud/DevOps: Docker, GitLab CI/CD, Talend (ETL)

Languages: English: C1, German: C1, Turkish: Native

Other: REST API (OpenAPI), JIRA, HPQC, Graph Neural Networks, VaR Computation, Time Series Analysis

Experience

PostFinance AG, Software Test Automation Engineer

Bern, Switzerland

- Automated independent end-to-end tests of the company web and mobile applications on the system level by means of black-box testing using an internal test automation toolbox built on top of Appium and Selenium
- Detected and reported countless bugs and issues in the diverse frontend and backend systems of the company, contributing to the overall quality of the applications
- Worked in four releases in a year using agile methodology
- Used the issue tracking service JIRA and the application lifecycle management tool HPQC

May 2024 – present
2 years 6 months

ZZ Vermögensberatung (Schweiz) AG, Financial Software Engineer

Vitznau, Switzerland

- Developed internal "Knowledge Base" web app using React.js, Spring Boot, and PostgreSQL, streamlining business processes for 25+ colleagues
- Built automated CI/CD pipelines using GitLab runners in Docker for seamless application deployment to prod/dev environments, over 80% improvement of build time of the web application
- Created in-house Value-at-Risk computation framework in Python integrated with company data warehouse using Pandas/NumPy
- Parsed XML files to identify data load errors in Java, enabling team to review and correct issues daily

July 2022 – Apr 2024
1 year 10 months

Hoffmann-La Roche, Master's Thesis Student

Basel, Switzerland

- Conducted literature review on corporate skills management using machine learning
- Implemented and evaluated graph neural network method to learn skill representations
- Achieved 72% F1-score on skill prediction task by collaborating cross-functionally

Sept 2021 – Feb 2022
6 months

ABB Corporate Research Center, Student Internship

- Designed Docker containers interacting on Hyperledger Fabric blockchain to store IoT sensor data
- Built React.js front-end application interfacing with the blockchain network

Baden, Switzerland

July 2020 – Dec 2020

6 months

Education

Msc. Swiss Federal Institute of Technology Lausanne (EPFL), Computer and Communication Sciences

Lausanne, Switzerland

Sept 2019 – Apr 2022

- GPA: 5.20/6.00
- **Graduation thesis:** Graph Convolutional Networks for Skills Management in Large Organizations
- **Coursework:** Advanced probability and applications, Cryptography and security, Distributed algorithms, TCP/IP networking, Deep learning, Information security and privacy

Bsc. Boğaziçi University, Electrical Engineering & Mathematics

Istanbul, Türkiye

Feb 2015 – July 2019

- GPA: 3.59/4.00
- Admitted to Boğaziçi University (BOUN) by ranking 300th among 2.5 million candidates (**top 0.012%**) in the national entrance exam
- Graduated with double major in maths and electrical engineering with high honors
- **Coursework:** Pure mathematics and electrical engineering courses

Istanbul High School, High School Diploma

Istanbul, Türkiye

Sept 2009 – Aug 2014

- Admitted through high-ranking national exam performance
- Completed a rigorous dual-curriculum education primarily taught in German
- Awarded both the Turkish high school diploma and the Abitur, granting direct admission to universities in Germany, Switzerland, and worldwide
